Amaze yourself!

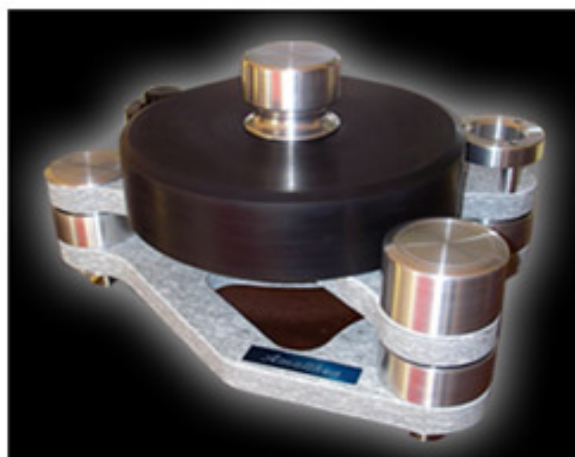

Amalthea

The highest expression of **Technology and Art**,
at music's service.

Sound that's no longer just a distant recollection
of a live performance.

To make the most of its evocative power,
Amalthea must be backed up by equipment that
can keep pace with its dynamic capacity and
ability to convey the smallest details.

Amalthea: The last word in perfection.

Features:

- Non-resonating stone sub-chassis.
- Semi-rigid three-point suspension system affording excellent vibration damping and isolation.
- Thick non-resonating stone plinth.
- Ultra-thick non-resonating synthetic platter with concave surface profile to improve contact with the record.
- Aluminum alloy support available with cut-outs for any type of tonearm.
- Separate high-torque motor.
- Aluminum alloy clamp.
- Weight: 30 Kg. (32 packed)
- Dimension (wxhxd): 500x294x350
(600x400x400 packed)
- Motor: 15VDC
- Power consumption: 10W (0.5A)
